

Dear All,

St. Xavier's College, XRCVC – Lake Shore Extension is happy to announce One-day Online Training Workshop on the theme "Standard G-Mail Using Ai with NVDA"

In the digital era, email communication is necessity for individuals in various areas such as work, personal use, government services, shopping, and more. G-Mail is also widely used email platforms, with millions of users—including individuals who are blind or low vision.

G-Mail currently uses "Standard View," which offers a variety of features designed to help users perform tasks efficiently. People who are blind typically use screen readers to access G-Mail.

Do you know?

- From 2024, Google has disabled the "Basic HTML View" in G-Mail, which was commonly used by screen reader users for its simplicity.
- Visually challenged users now face challenges to operate Standard G-Mail view.
- AI tools can be used to work more efficiently and increase productivity.
- Standard G-Mail view includes many useful features that were not available in the Basic HTML version.

This is your chance to enhance your knowledge of how to use Standard G-Mail effectively.

Join us for a **one-day online training** workshop where you will learn to use Standard Gmail with NVDA and Ai Tool, explore key features, and improve productivity.

Who can participate:

Persons with print disabilities such as blind and low vision. Participant should be a screen reader user. Persons from India only, have a good knowledge of screen reader, Typing, Internet browsing, Basic concepts of G-Mail.

Limited seats are available for the session.

Those interested should kindly register by using the link appended below.
