

Dear All,

St. Xavier's College, XRCVC - Lake Shore Extension is happy to announce an online workshop on the theme **"Understanding of General Accessibility with Screen Readers"** under its Tech Roshni series – A step at bridging the digital divide for blind and low vision persons.

- Do you often wonder how digital platforms and documents can be made more inclusive?
- Have you faced challenges in navigating websites, applications, or files using a screen reader?
- Are you aware that accessibility principles can transform the way information is shared and consumed by persons with visual impairments?

Creating accessible content is not only a best practice but also an essential step toward ensuring equal access to information. Before expecting others to provide accessible resources, it is important for us to understand and implement accessibility principles ourselves. Screen readers are powerful tools that enable blind and low vision persons to access digital content. However, accessibility is not just about technology—it is about designing and structuring information in ways that ensure equal participation for all. This workshop will provide participants with a broad understanding of accessibility concepts, practical demonstrations of screen reader usage, and guidance on how to make everyday digital interactions more inclusive.

Interested participants should register on or before **Thursday, 20 August 2026 by 11:59 PM** using the registration form link appended below.

<https://forms.gle/xgt23HdVrUTCrP9Q6>

Workshop Date and Time: Saturday, 22 August 2026 at 4:30 PM (IST)
